PRESENTS

SMART CLOUDS

Smart Clouds were introduced in 2008 and have been flying high above events all over the world. These environmentally safe clouds not only make an impact at your event but also for miles around. Smart Clouds are synthesized from a proprietary surfactant based foam formulation and lighter than air gases. They can travel for miles and last up to an hour depending on the atmospheric conditions. Our team is one of the most highly trained and can perform events all over the country. Call today at 0324-7997555 to discuss how Smart Clouds can make the difference at your next event

SMART CLOUDS

Introducing For The First Time In Pakistan

What are Smart Clouds made out of?

Smart Clouds are synthesized from proprietary surfactant (soap) based foam formulations and lighter than air gases such as helium, nitrogen and others

Are they environmentally safe?

Smart Clouds are "Green" and 100% environmentally safe.

Will they travel over my target?

Smart Clouds are very visible as they take flight to hundreds of feet high and miles of travel before they evaporate.

How complex of a logo can be made?

The Smart Clouds generators are available in 24-inch and 36-inch standard size versions. The layer the seneator the layer the logo.

Can any design be made into a Smart Cloud?

Some designs will be to complex to fly. There are certain attributes needed in a Flogo design for the cloud to keep it's shape properly in flight.

How long will it take to develop my custom Smart Cloud?

Our in-house art department will usually develop your custom Smart Cloud in 4 - 6 days. or events that require a shorter turn around time, additional rush fees will apply, but please note that not all designs can be translated to a Smart cloud.

SMART CLOUDS

Introducing For The First Time In Pakistan

How Long do they last?

Smart Clouds are designed to last for as long as their visual impact is needed. Specific formulations are available to provide a life expectancy of a few minutes to half an hour or so.

## What are the electrical requirements?

Each of our Smart Cloud machine requires one separate 20AMP circuit. (Generators can be provided at an additional cost if needed).

How long does it take to setup a Smart Cloud event?

The equipment has been designed for the event industry so they are built in functional road cases. Set up and breakdown are normally performed within 1-2 hour(s) by our technicians.
